## COLORED DISPOSABLE FACE MASKS

Per the CDC, facial coverings, when worn properly, have been shown to be effective tools to mitigate risk from asymptomatic and pre-symptomatic individuals amidst the COVID-19 Pandemic, particularly in environments where three to six-foot social distancing is not able to be maintained. Some states require facial coverings to be worn in order to patronize their municipalities, businesses and recreational areas. In all cases, coverings worn by employees should be kept clean and in accordance with CDC guidance.

These masks have a 3-layer construction to filter out pollutants, chemicals, dust and microbes from the air. Fitted with soft ear straps and an adjustable nose clip, these masks are sure to provide a secure and comfortable fit.

Why not do it in *style?* Risk Nothing®.
