

# FoodHandler® TEXTURED BLUE HYBRID GLOVES

FoodHandler's Textured Blue Hybrid Synthetic Poly Gloves with Advanced Hybrid Technology offer a patent-pending formulation to enhance operator performance and comfort, and an excellent value alternative to vinyl for many foodservice applications.

Combining the best in innovative glove technology and superior quality, these best-in-class, third generation hybrid gloves are outstanding for foodservice applications such as preparing and serving food. Ideal markets are supermarket delis and bakeries, restaurants, schools, and convenience stores.

## Advanced Hybrid Performance

Innovative poly blend with synthetic materials offers a higher level of performance versus standard poly gloves.

## Blue & "Green"

The blue color is popular in foodservice for glove visibility during food preparation and HACCP food safety standards. 100% recyclable, these are a great green material option.

## Excellent Stretch

Hybrid material blend yields excellent softness and decreased hand fatigue over vinyl, while not compromising the glove's strength

## Value

This innovative product provides excellent value versus other hybrids in the market, and a nice cost savings over vinyl gloves

## Market Leading Hybrid Glove

Since 2009, FoodHandler® has been the market leader and pioneer in hybrid glove technology.

## Textured

New diagonal cross-pattern texture provides increased grip and tactile sensitivity – important for operator comfort and increased hand dexterity. Ideal for securing food ingredients for sandwiches, salads and other items.

## Cuff First Dispensing

Ensures easier, safer glove changing. Extracting by the glove's cuff reduces the level of bare hand contact, thereby reducing the chances for cross-contamination.
